

SAY Digital: Your Solution Architect

Turn your ideas into launched products in 14 days, without risk or extra cost,
AI-optimised and under expert control

*AI did not change the way we code. It changed
the speed at which we turn an idea into real
revenue.*

Benjamin Joseph
Founding Partner — SAY Digital I/O

```
// PROCESS
```

Our Repeatable System

01

Specs & Design

Precise framing of your need

02

MVP

AI-accelerated development

03

Launch

Fast production launch

04

Iteration

Continuous optimisation → retention

// THE OFFER

The 2-Week MVP Offer

The constraint is intentional. By forcing a realistic MVP scope, we avoid overbuilding.

14

days from brief to launch

10K\$

transparent fixed fee

100%

AI-accelerated development

High-quality tested code

// WHY AN MVP

Why Choose an AI-Optimised Lean MVP?

Fast validation

Test your hypothesis with real users in days, not months

Controlled budget

Invest intelligently without wasting budget on unvalidated features

Continuous learning

Each iteration brings you closer to product-market fit

// MOMENTUM

Momentum: your tech team on demand

Momentum = {Fast Execution} × {Market Adoption}

Design & UX

Interfaces intuitives et attractives

New features

Continuous evolution based on feedback

Scaling

Support as you scale

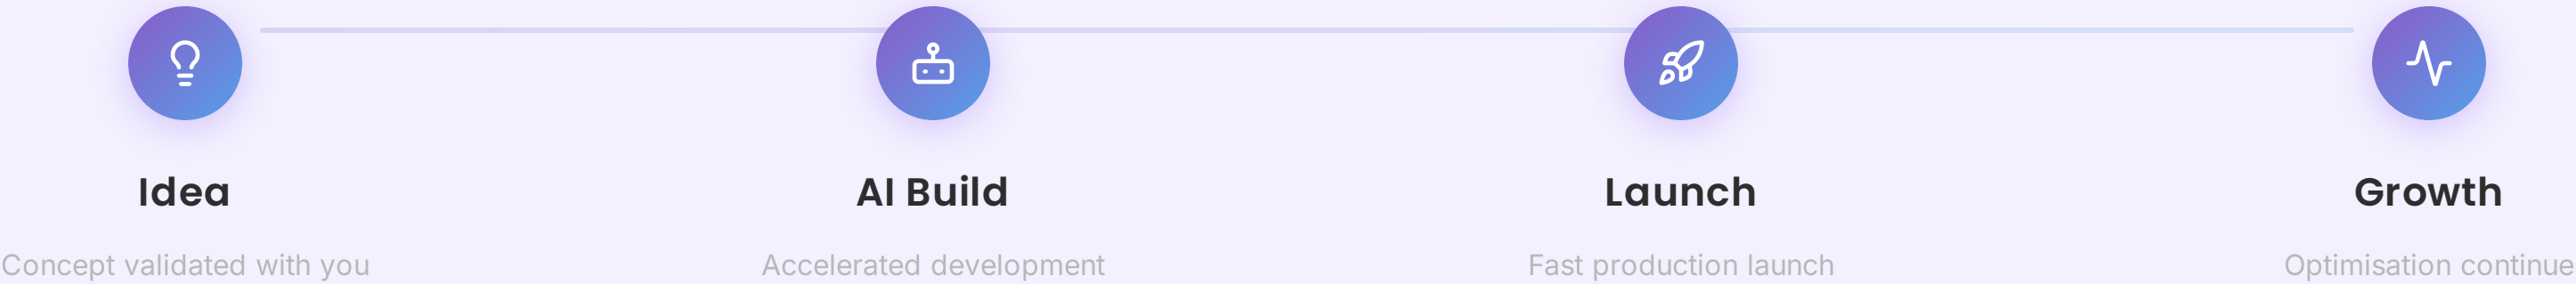

Optimisations

Continuous performance improvement

// ITERATION

Le Pouvoir de l'Iteration Rapide

AI makes iteration inexpensive when your foundations are clean. This is where we excel.

// COHORTE

The Cohort Model

Build and launch your app in less than a month

Developer access

Our technical team at your service

Designer access

Product design expertise

Live AI guidance

Real-time learning

Real builds

No theory, only concrete delivery

// CAPABILITIES

Our Real Skill

AI builds the software. You decide what matters.

Clarity

Turn fuzzy ideas into precise specifications

Scoping

Define the minimal scope that maximises impact

Speed

Ship in days, not months

Communication

Full transparency at every step

// AI DEVELOPMENT

AI-Optimised MVP Development

AI power + human orchestration = the right balance of cost, speed and quality

Developer Orchestration

Senior developers supervising AI tools — far from vibe coding

Iterative Development

Human review after every phase to correct AI hallucinations

Multiple AI Tools

Each task assigned to the best-performing AI model

Predictable Outcomes

Full project control, reduced risk of surprises

Why SAY Digital?

Execution speed determines success. We give you the decisive advantage.

Ready to Launch Your MVP?

Join the founders who choose speed, clarity and flawless execution.

- 01 Book a strategic call
-
- 02 Define your MVP
-
- 03 Launch in 14 days
